Subject: Provision of Safety Signage at BTS sites.

This has reference to the representation made by COAI and AUSPI on provision of safety signage at BTS sites and the text of signage. As per the Addendum (Issue 2 August 2010) to the GR No. TEC/TP/EMF/001/01.Sep 2009, minimum three safety signage to be provided by all Telecom Service Provider operators at mobile BTS sites:

- (i) DANGER: on the tower structure
 - (ii) WARNING: at the entry point of exclusion zone.
 - (iii) CAUTION: at the entry point of roof of the building of BTS in case of RTT or at the entrance of BTS compound in case of GBT.
2. In this regard, the placement of DANGER signage and CAUTION signage is clearly specified; however, the placement of WARNING signage is linked with exclusion zone. It is clarified that, WARNING signage is to be provided only when exclusion zone is falling at the place accessible to public.
3. It is also clarified that the text of signage is as per International Standards. Therefore, the request of COAI/AUSPI to change the text of signage is not accepted.
